iv) Discipline

This is the backbone of every progressive society or institution. Allow me invite each one of us to ensure that we seriously talk to our children about discipline and how important it is to remain disciplined today and even in the future. There is great improvement and as teachers we shall not get tired of doing our part in ensuring that all Nyali School Champions are disciplined.

v) Communication

Communication is a powerful tool which when used effectively and directed to the right people is a great pillar in achieving goals that each one of us desire. Dear our esteemed parent, kindly let us use this powerful tool to build our school and to nurture our children for the future. Let us humbly plan to channel our feedback and concerns to the right offices for action to better our services to the children and parents as well.

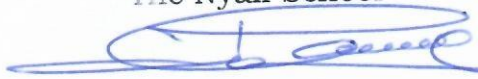

vi) Coding Lessons.

The Nyali School in conjunction with Kodris Africa is starting coding lessons for our learners this term. The coding curriculum will improve the creativity of our learners by equipping our learners (7-16yrs) with skills for developing computer applications at a young age. With coding skills our children will be able to approach problems with different perspective and produce solutions.

We are looking forward to your total support and involvement in all aspects. May our good God (Allah SW) bless each one of your work and as you plan to accord us the much needed cooperation.

Yours faithfully,

For and on behalf of
The Nyali School
